Hand & Footwear

Hearing Protection

Locks & Lockouts

Fall Protection

If your employees work at elevated heights, the risk of accidental injuries and death increases significantly. To comply with the Ontario Occupational Health and Safety Act, it's crucial to provide adequate fall protection and training. Our safety supply store in Ottawa offers a large array of fall protection, including:

- Anchors
- Connectors
- Harnesses
- Lanyards
- Lifelines
- Signs

Respiratory Protection

Under the Ontario Health and Safety Act, construction workers must have adequate, well-fitting protection against hazardous airborne agents. Our safety supply store in Ottawa has a large selection of quality, affordable respiratory protection equipment with price ranges from low to high. Choose from:

- Elastomeric respirators in full-face or half-face styles
- Powered-air purifying respirators
- Supplied air respirator systems
- Particulate respirators
- Reusable and disposable face masks

First Aid Kits

First aid kits are always an excellent idea when working with dangerous tools and machinery, as they can potentially save an individual's life. According to the Ontario Workplace Safety and Insurance Act, you must have a first aid kit suited to the number of workers. We offer first aid kits by size, components, class, or province. Our 1-5 employee kits are economically priced, while our larger kits, serving a workplace of up to 200 people, can cost around \$100.

Safety Eyewear

According to federal and provincial safety regulations, it's important for construction workers to wear protective gear, including protective eyewear, and have access to emergency eyewash stations when handling chemicals or other hazardous materials. Our safety eyewear and accessories can help prevent wood dust and other irritating materials, electrical sparks, and tools or equipment from harming the eyes. As we specialize in providing safety equipment in Ottawa, you can count on Ottawa Fastener Supply for high-quality eyewear from \$2 to \$50.

Headwear

Protect your employees and adhere to provincial law with help from Ottawa Fastener Supply. Every construction worker on an Ontario construction site has to wear a hardhat when working near:

- Areas of potential head injury due to falling objects or debris
- Hard-surfaced materials
- Electrical conductors and exposed wires

With our affordable safety equipment it's easy to supply a whole team of workers with high-quality head protection and any needed accessories.

Hand and Footwear

If you're looking for premium safety clothing in Ottawa, you can consider Ottawa Fastener Supply your go-to source for a carefully selected stock of protective headwear and footwear. We supply protective gloves, performance and ergonomic gloves, electrical gloves, and thermal gloves to support your specific projects at low-cost prices, from \$2 to \$50 a pair.

Hearing Protection

Hearing protection is critical on most construction sites, as machinery and large equipment can often emit noise greater than ears can handle, leading to hearing loss immediately or over time. In Ontario, it is compulsory to protect workers against sound levels greater than a weighted average of 85dBA during an 8-hour shift. You can rely on our safety supply store to provide efficient earmuffs or ear plugs.

Locks & Lockouts

Construction sites are frequently targeted for theft and vandalism. It is important to keep your tools, equipment, machinery, and materials safe and protected by implementing locks. Likewise, you can prevent unauthorized individuals from accessing dangerous machinery by installing lockouts. Although these items are modestly priced, from as little as \$2 to only \$50, they can greatly help protect valuable resources.
